

STINGRAY

Quick Start Guide

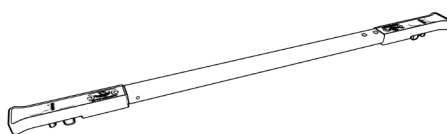

1

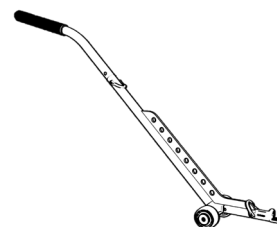

Assemble the Swift LiftR bars and unpack Stingray skates and accessories.

Stingray skates

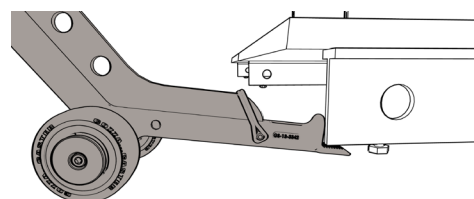

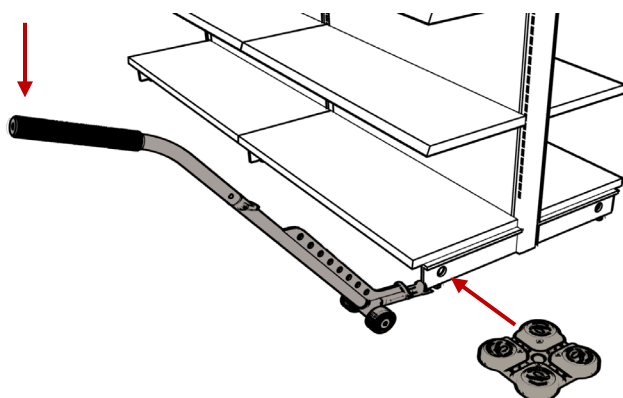

Connector bars

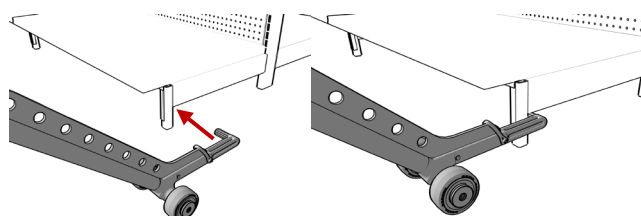

Assembled Swift LiftR bars

2

Lift one corner, and then slide the skate under until the gondola foot or leg is aligned with the skate's center. Lower the gondola onto the skate.

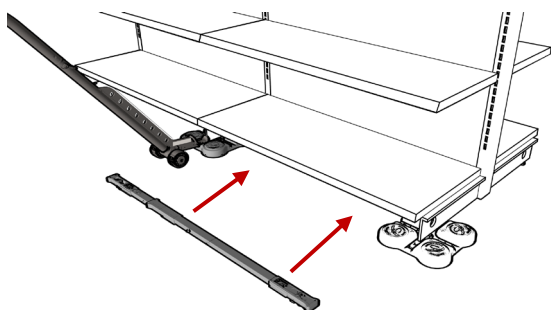

Proper use of chisel adapter.

Proper use of side shaft adapter.

3

Lift next upright and slide the next skate under. Attach connector bar to both skates and lower. Repeat steps for each skate.

4

Remove connector bars, and then remove skates.
