Custom Fixture Mobilization System

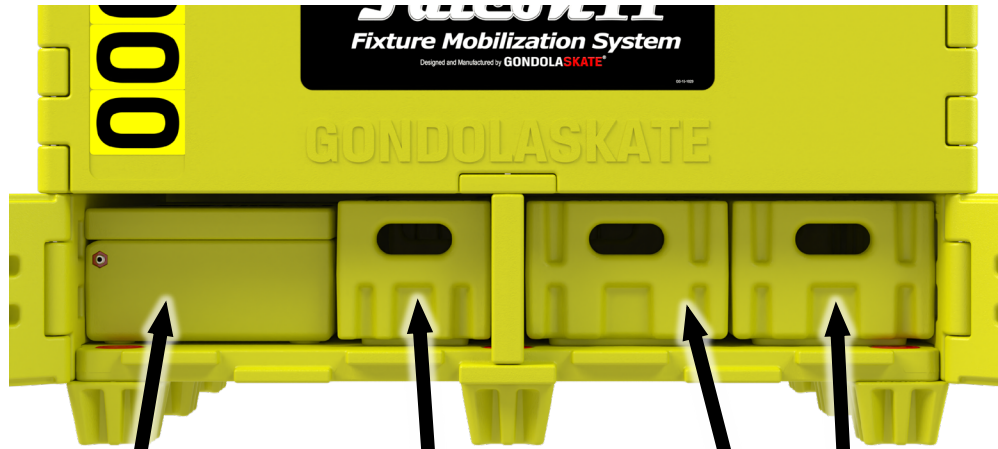

Upper-Level Packing Instructions

NOTE

- There are four different locations the **Lifting A-Bar** can be stored. It does not matter what locations are used
- **Connector Bars** must be in the extended configuration. If Connector Bar is in the collapsed configuration, it will not be able to be properly stored.

Lower-Level Packing Instructions

(1) Loaded Swift
LiftR Box

(10) Widespan Yoke
Adapters

(24) Stingray
Skates

NOTE

- The **smaller tub** that holds the **10 Widespan Yoke Adapters** must be stored next to the **Loaded Swift LiftR Box**
- The **two larger tubs** that hold **12 Stingray Skates** each will always be stored next to each other

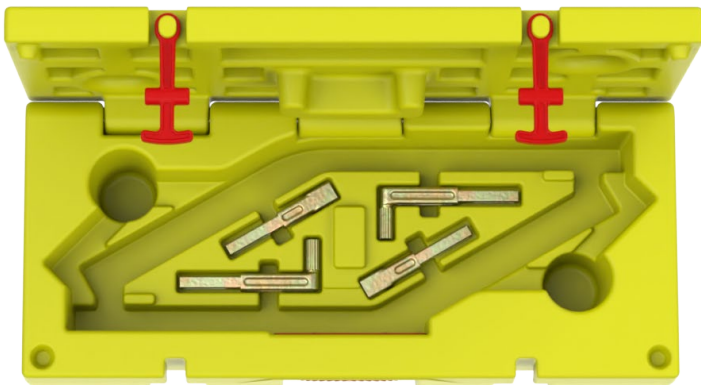

*Packing of these components will be shown in following steps

Swift LiftR® Box Contents and Packing Instructions

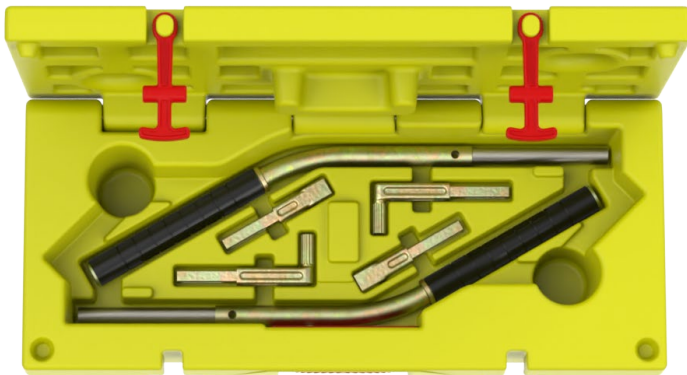

Swift LiftR® Box Contents

Box Includes:

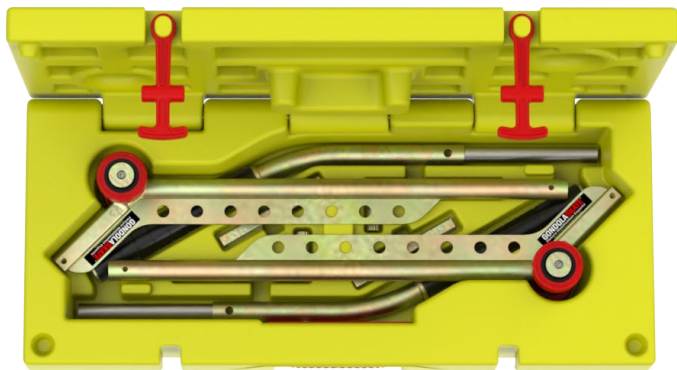

- 2 – Swift LiftR handle assemblies
- 2 – Swift LiftR lower assemblies
- 2 - Chisel tip adapter
- 2 - 90° adapters

1. Insert **2 Chisel adapters** and **2 90° adapters** into respective slots

2. Insert **2 Swift LiftR handles** as pictured

3. Insert **2 Swift LiftR lower assemblies** as pictured.

Lower-Level Tubs Packing Instructions

Stingray Skates should be stacked and stored as pictured above. The **first layer** of skates should be placed with the **wheels facing up**, and the **second layer** should be placed with the **wheels facing down**. Repeat for next two layers.

Each **Larger Tub** stores **12 Stingray Skates** in this kit.

10 Widespan Yokes are stored in the smaller tub. They should be neatly placed into the tub similarly to the picture above.
