

# FALCON II

## Quick Start Guide

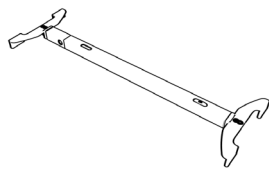

1

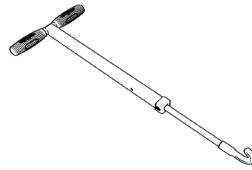

Unpack Falcon II skates and accessories.

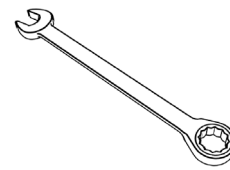

Falcon II skates

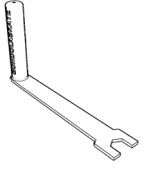

Connector bars

Pull bars

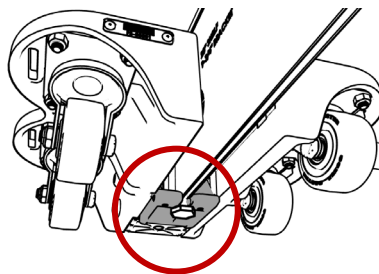

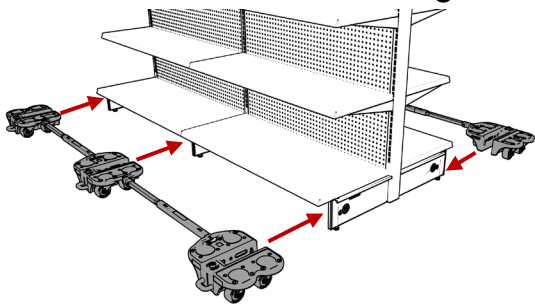

Ratcheting wrenches

Leveling foot wrenches

2

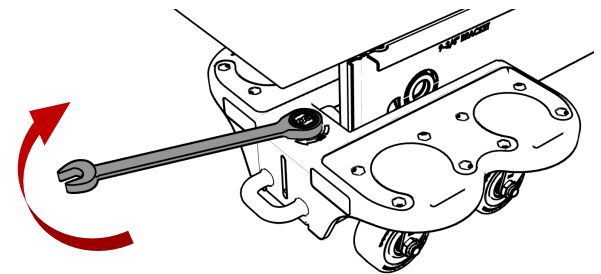

After removing the gondola kick plates, connect each skate using connector bars, and then install skates to leveling feet.

Make sure you cannot push skate under any farther.

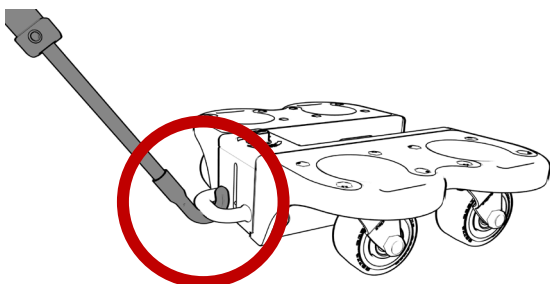

3

Raise the lift mechanism on each skate. Make sure the fixture is raised sufficiently off the ground using the leveling foot wrench.

4

Mobilize gondola using the pull bar inserted into the pull hook on the skates.

5

Lower fixture and remove skates.
